

KPT-35N-S10 Remote Keypad

Easy Access at Your Fingertips

- Prolonged Battery Life
- Integrate NFC tags
- Audible beeps to indicate entry/exit delays

KPT-35N-S10 Wireless Remote Keypad provides easy-to-use, on-premises security system control for enhanced flexibility and convenience. It is designed to have quick access control of the System Control Panel via PIN Code or NFC label. Its prolonged battery life saves time for maintenance. The dual key function can activate panic, fire, medical, or emergency alarm at one press, providing users with an additional peace of mind and safety.

The KPT-35N-S10 can be further configured to emit entry/exit delay beeps. If your control panel is distant from the front door and you have difficulty hearing its entry/exit delay beeps, the KPT-35N-S10 can serve as a useful reminder device, emitting entry/exit delay beeps that urge you to disarm your security system or leave quickly.

The KPT-35N-S10 includes a proximity reader to enable arming and disarming with Near Field Communication (NFC) tag, without having to enter a pin code manually.

Completely wireless, the KPT-35N-S10 can be mounted on the wall or placed on tabletops or nightstands, allowing users the flexibility to place it at the most convenient and accessible location anywhere in the home.

Features

- Keypad illuminated for easy night time visibility
