

VESTA universal transmitter with long battery life

- VESTA universal transmitter with long battery life
- Detects activation of a connected wired device, including door contact, PIR or PIRcam detector, smoke detector or panic button
- Compact and slim design for easy mounting
- Low battery detection
- Random monitoring signals for trouble-free system integrity check
- Tamper protection protects against unauthorized removal, sabotage, or unstable installation
- Grade 2

Reference / Model

VESTA-110 / UT-15SL-F1

Universal contact supervision transmitter, designed to supervise the activation of a specific wired sensor connected to it. Whenever the wired device is activated, the device will transmit an alarm signal to the control panel and notify users of an alarm event. Provides flexibility and agility in the deployment of security.

The design consists of a cover and a base. The cover contains all the electronic components and the base provides a means to secure the device. An included tamper switch provides protection against tampering and against unauthorized opening and / or removal of the device.

Specs

RF frequency: F1 868MHz
Power supply: 3V, CR2 lithium battery
Battery life of more than 6 years
-10 ° C ~ + 45 ° C operating temperature
Relative humidity up to 85% (non-condensing)
Dimensions: 32 (W) x 107 (H) x 22 mm
Grade 2
