

Relay controller

- VESTA relay controller
- Automate pool covers, gas and water valves, sprinklers, etc
- SPDT relay output
- It allows integrating relay activation events in other home automation activities
- AC power input

Reference / Model	VESTA-206N / PRL-3-F1
VESTA relay controller	
Automate home pool covers, gas valves, water valves or sprinkler systems, etc.	
Provides radio operation of any device controllable by a SPDT relay	
F1 protocol	
RF frequency: 868MHz	
It allows integrating relay activation events in other home automation activities	
One relay contact and one dry contact	
Screw terminals for easy and secure installation	
Operates on AC power supply (110 ~ 230 volts)	
LED confirms proper network connectivity and operation	
5A current load	
SPDT relay output	
-10 ° C ~ + 45 ° C operating temperature	

Relay controller

Reference / Model	VESTA-206N / PRL-3-F1
Operating humidity up to 85% (non-condensing)	
Dimensions: 71 x 49 x 26 mm	
CE compliance
