

User drop sensor in VESTA collar format

- User drop sensor in VESTA collar format
- Activates the alarm call when a fall is detected
- Manual activation by pressing the button
- Periodic monitoring signals to verify the integrity of the system
- LED indicator
- Used as a neck pendant
- Low battery detection
- High stability and sensitivity
- IP67 waterproof and dustproof standard

Reference / Model	VESTA-080 / Fall Sensor
<p>VESTA-080 (Fall Sensor) from VESTA provides one of the most effective solutions to minimize potential damage when older people fall. Worn by users as a collar 24 hours a day, the drop sensor automatically triggers alarm calls to the monitoring center and triggers the medical alarm to open two-way voice communication when the drop is detected.</p>	
<p>As one of the major causes of morbidity, falls can seriously affect the health of older people. Sensor drop detection reports ensure help arrives as quickly as possible. Users can also press the drop sensor button to call for help when they need it.</p>	
<p>Small and stylish, designed to be lightweight and comfortable. It contributes to the establishment of a complete telecare supervision network in any home.</p>	
specs	
<p>Frequency: 433MHz / 868MHz / 869MHz 3V CR2477 lithium battery Battery life of up to 2 years * Degree of protection IP67 -10 ° C ~ + 45 ° C operating temperature Operating humidity up to 85% (non-condensing) Dimensions: 59 x 42 x 19 mm Note: * Battery life varies by use and configuration.</p>
